

# The First USB Data Protector with FIDO2

Seamlessly Combining Authentication and Data Protection  
Enterprise-Grade Remote Access Service (OEM/ODM) Available

## Features

### 1. PGP Encryption for Secure Data Exchange

Ensures secure communication for both supply chain operations and individual users.

### 2. Protect Your Files with Advanced Encryption

Safeguard specific files on your PC using encryption. When Blentity is removed, files become unreadable, ensuring zero data leakage even if the PC is stolen.

### 3. Password-Free, Simple, and Secure Login

Certified by FIDO2 Level 2 and U2F for ultimate security.  
Enjoy hassle-free mobile login without entering passwords

### 4. Comprehensive Data Protection with a Single Device

- Military-grade file encryption (Hardware-based AES 256).
- Features separate Plain and Encrypted storage for versatile use.

### 5. Enterprise Remote Control Services

Remotely lock storage devices through enterprise-grade services for added security.
